DETAILED ACTION

Response to Arguments

Applicant's arguments filed 4/11/2007 regarding the restriction requirement have been fully considered but they are not persuasive. The argument that the subject matter is related and a single search would encompass all claims is not persuasive. As described previously, the subject matter is classified differently and therefore a search of all of these different inventions would indeed cause a serious burden on the Examiner. Therefore, the rejection is still FINAL.

Applicant's arguments, see Remarks, filed 4/11/2007, with respect to the drawings have been fully considered and are persuasive. The objection of the drawings has been withdrawn.

Applicant's arguments filed 4/11/2007 have been fully considered but they are not persuasive. Applicant's arguments are not persuasive because the amendment to the claims has caused an indefiniteness problem and therefore the exact claimed invention cannot be determined (see the 112 rejection below).

The rejection stands as follows.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1746

Claims 5-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 recites the limitation “the fibers”, “the filter member”, and “the tank” in lines 8-9. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless – (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Berndt (US Patent No. 6,086,635).

Berndt discloses a dry-cleaning machine having a heating coil (34) providing hot air, condenser (36) and a water separation unit (28) for removing water from a mixture of solvent and water where it is a coalescer type of filter (Fig. 4, Item 64; col. 5).

Allowable Subject Matter

Claims 6-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and the 112 issue is corrected. The reasons for allowance were indicated previously.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
